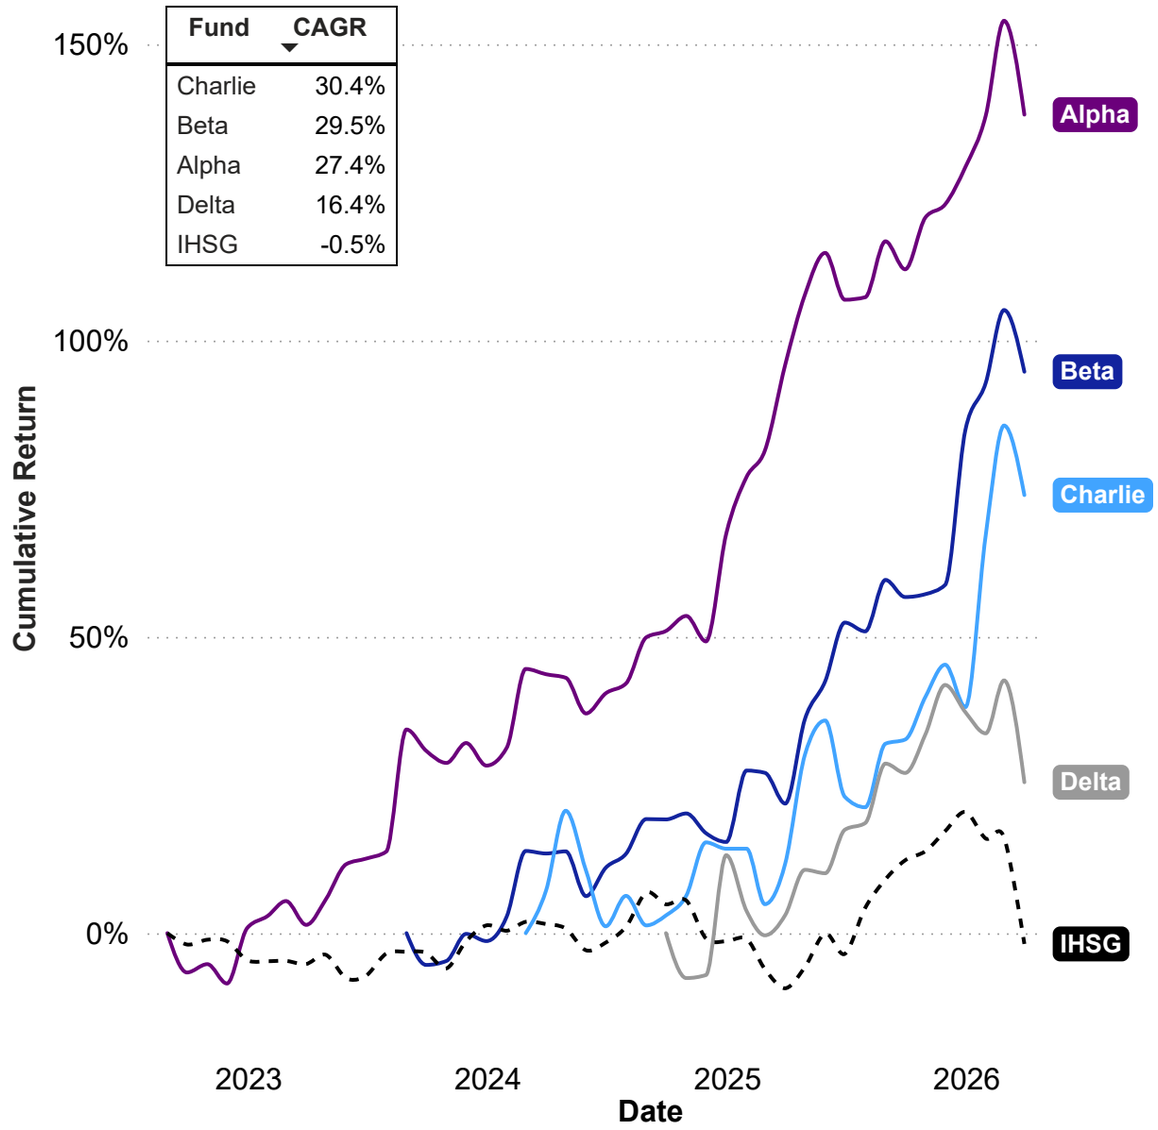
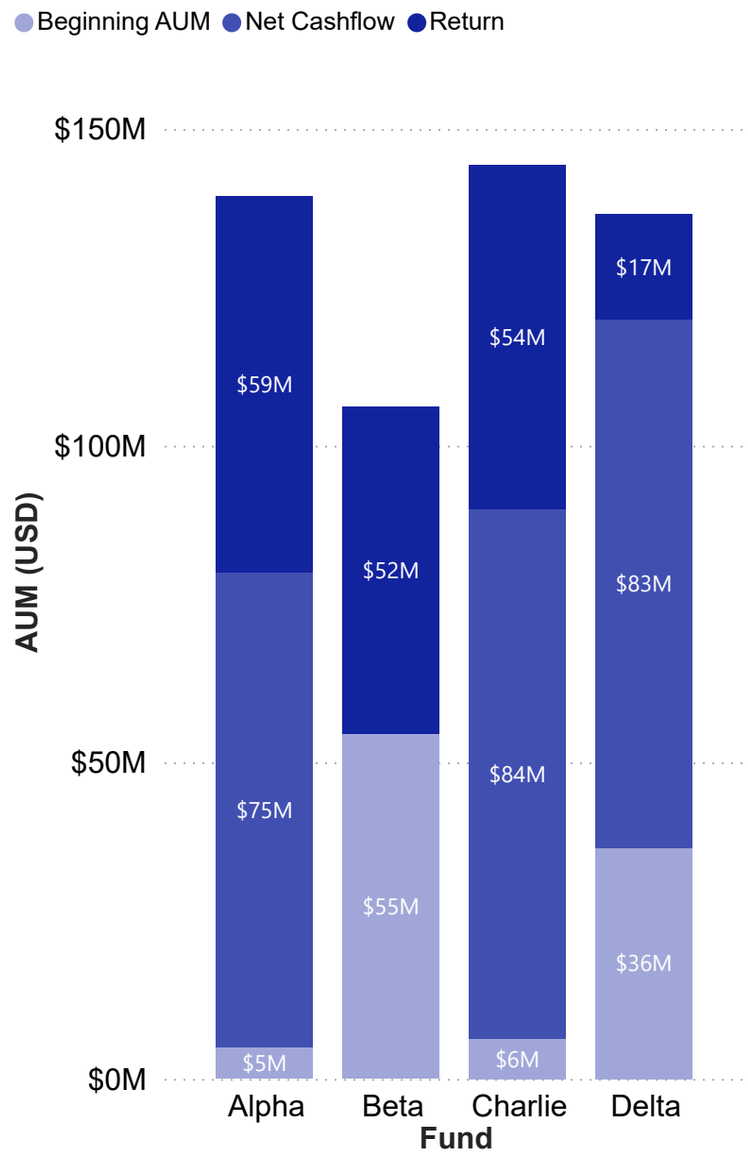
Cumulative Return & CAGR

Fund	CAGR
Charlie	30.4%
Beta	29.5%
Alpha	27.4%
Delta	16.4%
IHSG	-0.5%



AUM Movement



Note: 1) Cumulative Return & CAGR are calculated using a Time-Weighted Return methodology from the later of the selected start date or the fund inception date to the selected end date, which isolates investment performance from capital inflows and outflows. **2)** Cut-off date is end-of-month, so if date 9/2/2022 - 3/20/2026 is selected the dashboard will show performance between 9/30/2022 - 2/28/2026 instead.
